ABOUT

Full Stack Developer

Software Developer with 4+ years of experience building web applications for clients and company products. My core work is in PHP, Laravel, React.js, WordPress, HTML, CSS, and MySQL. At AppQuell Technologies since May 2022, I progressed from Frontend → Backend → Full Stack Developer, working on bankruptcy case-management SaaS platforms used by law firms across the USA.

WORK HISTORY

Experience

APPQUELL TECHNOLOGIES

Full Stack Developer

Jan 2024 – Present · Full-time · Kharar (On-site)

- → Full-stack applications in Laravel, PHP, React.js and MySQL for law-firm SaaS platforms
- → Admin dashboards, backend features and database-driven modules
- → Frontend with React.js, HTML, CSS; WordPress websites for clients

PHP · Laravel · React.js · WordPress · MySQL · Git · Android Studio

APPQUELL TECHNOLOGIES

Backend Developer

Dec 2022 – Dec 2023

- → Backend features and admin dashboards in Laravel
- → MySQL databases and PhpMyAdmin; dashboard modules

PHP · Laravel · MySQL · PhpMyAdmin

APPQUELL TECHNOLOGIES

Frontend Developer

May 2022 – Nov 2022

- → Frontend layouts in HTML/CSS; visual designs with Adobe Photoshop

CHEGG INDIA

Subject Matter Expert

Feb 2021 – May 2022 · Freelance

- → Provided detailed, step-by-step solutions to student questions as a freelance Subject Matter Expert

WHAT I'VE BUILT

Projects

2026 – Present

MatterVanta — Bankruptcy Case Management Platform

- → Built most of the platform at AppQuell Technologies — bankruptcy SaaS used by US law firms
- → Client questionnaire, intake forms and attorney review workflows
- → Document collection with version history, combined PDFs and inbound documents
- → OCR extraction that autofills questionnaire fields from uploaded financial PDFs
- → Petition preparation, attorney–client chat and text messaging
- → Plaid imports, credit report imports and paystub management
- → Case data exports to Jubilee and official form generation using PDFtk

Laravel · PHP · MySQL · JavaScript · React.js · Plaid API · PDFtk · OCR

Jun 2025 – Present

Parking Management System with License Plate OCR

- → Full parking flow — add vehicles, mark in/out, listings, search, event-based parking
- → Live dashboard and Excel export for reports
- → Automated license-plate recognition using Tesseract OCR
- → Later upgraded to Python API service using YOLOv8 + OpenCV + EasyOCR for better accuracy on real-world photos

Laravel · PHP · MySQL · JavaScript · Python · YOLOv8 · OpenCV · EasyOCR

Jun 2022 – Present

BK Questionnaire (BK Assistant) — Bankruptcy SaaS

- → One of the main developers since 2022 — bankruptcy platform used by US law firms
- → Multi-tab client questionnaire: Basic Info, Property, Income, Debts, Expenses, Financial Affairs
- → Attorney dashboards, client and case management features
- → Document collection, upload flows, document progress and review
- → Paystub and paycheck calculations for attorneys
- → PDF generation with PDFtk — official and local court forms, combined PDFs
- → Case data exports to Jubilee and Best Case bankruptcy software
- → Plaid API integration for bank account and transaction imports
- → Intake forms, OCR tools, Excel/CSV imports, email notifications, admin management

Laravel · PHP · MySQL · Bootstrap · JavaScript · Laravel Passport · Plaid API · PDFtk

Jun 2022 – Present

RSSB Management System — Sewadar & Schedule Management

- → Internal system for RSSB to manage sewadar (volunteer) scheduling and records
- → Duty schedules, nominal rolls and attendance reports
- → Centers and area management, vehicle and driver assignments
- → Tools for syncing sewadar records and merging duplicate entries

Laravel · PHP · MySQL · JavaScript · Bootstrap

May 2022 – Present

Client Projects — WordPress, Laravel & React

- → Built and customized WordPress websites for various clients
- → Developed Laravel-based web applications with admin panels and database features
- → Built React.js interfaces on Laravel backends
- → Projects range from business websites and landing pages to custom web tools
- → Client and project names are not publicly listed

WordPress · Laravel · React.js · PHP · MySQL · HTML/CSS

BUILT ON MY OWN

Personal Projects

Personal Project

Passbook — Personal Finance Tracker (Android)

- → Native Android app in Kotlin + Jetpack Compose (Material 3) for tracking credits and debits
- → 6-digit PIN + fingerprint lock, auto-relock when the app goes to background
- → Entries with search, filters, categories, accounts, recurring templates and monthly summaries
- → Export to CSV / PDF, JSON backup & restore, Firebase Realtime Database sync

Kotlin · Jetpack Compose · Material 3 · Firebase · Android

Personal Project

Passport Photo PDF — Photo to Print-Ready PDF

- → Take or upload a photo, then crop, zoom, rotate, straighten and flip with a head-position guide
- → Passport sizes (35×45 mm, 2×2 in, custom) on A4, US Letter or 4×6 paper — 1 to 500 copies
- → Live print-layout preview and 300 DPI print-ready PDF download
- → One codebase runs as a website / installable PWA and as Android & iOS apps via Capacitor

React · TypeScript · Vite · Capacitor · PWA · jsPDF
